PREPARATION INSTRUCTIONS FOR TUB, SINK AND WALL TILE

1. There can be NO construction work during the appointment.
2. Before the technician arrives remove all loose items from the bathroom.
3. Shower door(s) MUST be removed prior to our arrival.
4. Dripping faucets MUST be fixed prior to our arrival.
5. The fixture we are refinishing must be plumbed in.
6. We need access to running water.
7. The technician should complete the work within approximately 3-5 hours.
8. The technician will remove caulking from the perimeter to the tub prior to refinishing.
The caulking MUST be replaced after the drying period (48 hours). PP&G can provide this service as well as apply a nonskid surface for an additional fee. This service can be arranged 2-3 days after the refinishing. The nonskid is a nonslip surface applied to the bottom of the tub, it will serve purpose of a bathmat.
9. For wall tile refinishing: If tile is behind the toilet and vanity, removal of the toilet and vanity is required prior to our arrival.
10. Painting or wallpapering of walls is recommended after tub, sink and tile refinishing.
